instruction. But we shall need done information the hest? We think of going at far as the Lavis with horses and then tolking oxer. What kind of providion, and how much of It for a man had me botter take, to lost Several month after me get to California. We think of Starting from here about the first of April, to be in the Lows, the 15th. I think of gathering the Seed of all rare plants. When I Lee you I stall the pleased to Lee Spesimones Hosalities. I have, work on New Meseiso & Ealisonia. I have handen bed the Entere Rotanical catalogue contained within. I shall take pleasure in collecting the cartaceas for you, if it is possible to presence them. You will give me in thiretias in relation to them I can take good drawings of them, describing Then habits X. C. I regret that I have not more botanicat works that will give me useful information whom the botant of that distant country. I have one no. of the bombod The that no. That combrood The Aster X.6, 1) of the How have also the latest Estation of Estan & Minghet I have just received a letter from Mm De Tynde om representative to congress, who hand that
